Tehran Shahid Rajaei

// Languages

- English
- Persian

Frontend Developer at LandEye

Mar 2025 – Oct 2025 – Amsterdam, Netherlands – Remote

Developed the front-end of an advanced international platform for purchasing and ordering satellite and aerial imagery. Built complex interactive map features using **React, Next.js**, and **TypeScript**, integrating functionalities such as map layers, area selection, and image previews. Implemented Stripe for secure international payments and optimized UI performance for smooth data-heavy visualizations. Collaborated with back-end and product teams to deliver a responsive, scalable, and user-friendly experience.

Full-stack Developer at Stage technology

Nov 2022 – Aug 2025 – British Colombia, Canada – Remote

Developed and maintained a full-stack Web3 platform focused on metaverse interaction and digital experiences. Implemented dynamic, scalable user interfaces with **React** and **Next.js** and built robust REST APIs using **Nest.js** and **PostgreSQL**. Collaborated closely with cross-functional teams to design, test, and deploy backend logic ensuring performance and reliability. Contributed to building new features aligned with emerging Web3 and Metaverse technologies.

Full-stack Developer at TenzuMusic

Nov 2020 – Sep 2022 – Tehran

Developed and maintained a high-performance eCommerce platform for a music technology company serving studios and broadcasters. Led front-end development and built RESTful API services with **Nest.js** and **Express.js** to support scalable product and order management. Created a reusable **React** component library and design system with multi-theme and multi-language support.

React-Native Developer at MenuBuzz

May 2022 – Aug 2022 – Tehran – Freelance

Developed an Android application for terminal-POS devices used by hotels, restaurants, and cafés to manage B2B orders. Built the app using **React Native**, **Expo**, and **TypeScript** with a focus on performance and usability for daily business operations. Implemented **WebSocket** connections to handle real-time order updates and event synchronization between clients and servers. Designed responsive, accessible user interfaces using **Tailwind CSS**, **CSS3** animations, **Lottie**, and **AOS**.

Software Developer at MedClerx

Dec 2021 – Aug 2022 – Tehran – Freelance

Developed and maintained a healthcare web platform enabling communication and image sharing between imaging centers and doctors' offices. Built the doctor panel and integrated a **DICOM** viewer for secure online access to medical images and records. Debugged and refactored the patient mobile application, adding new features such as digital signature capture. Implemented **React Flux** architecture for efficient one-way data flow and client-side caching using **React Query**. Integrated external APIs and third-party services to enhance functionality and streamline user experience.

Frontend Developer at RamBody

Jul 2021 – Dec 2021 – Alberta, Canada – Remote

Contributed to developing and maintaining a platform that helps personal trainers organize and optimize their coaching services. Refactored and debugged features in the Trainer Portal web app while improving code consistency and reusability across projects using a Lerna monorepo. Integrated GraphQL APIs and implemented Apollo Client caching to enhance data handling and performance. Collaborated on cross-platform mobile development for the Athlete app using React Native and TypeScript.

Frontend Developer at LinkSee

Feb 2020 – Oct 2020 – Amsterdam, Netherlands – Remote

Developed the front-end of an online clipboard platform for managing links and collections, serving thousands of users. Built the application from scratch to production, implementing complex features such as drag-and-drop and progressive web app functionality. Created reusable, responsive UI components based on a Figma design system. Collaborated closely with the CTO and coordinated with team members to ensure product quality and timely delivery.

Wrote and maintained unit tests with Jest and React Testing Library to ensure stability and code

Freelance Web Developer

Jul 2021 – Dec 2021 – Tehran – Self-Employed

Developed MVPs and web services for various clients, including managers and small business owners, focusing on usability and fast delivery.

Built and maintained complex AJAX-based applications using the jQuery library. Collaborated with clients to translate business requirements into functional, responsive front-end solutions.
